

**SUBJECT: Directive 2011/65/EU - 2015/863/EU– RoHS
Directive 2012/19/EU - RAEE**

Dear Sirs,

Our products, as generally electric conduits and accessories, do not belong to the application fields of the RAEE and RoHS Directives, because they are not among the devices mentioned from the Directive itself (Annex 1A of the RAEE Directive).

Our products, which could be part of the application field of the Directive as integrant and complementary parts of the appliances considered from the Directive, comply with the limitations to the use of dangerous substances foreseen from the above-mentioned Directives.

Currently, all the products manufactured by PM FLEX already comply with the requirements and the restrictions of RAEE - 2012/19/EU e RoHS – 2011/65/EU - 2015/863/EU.

We stay at your complete disposal for any further questions and thank you for your attention.
Best regards,

Almenno S.B., 14/10/22

PM FLEX
